DETAILED ACTION

The previous Office action mailed 6/6/07 is rescinded as agreed in the interview on June 27, 2007 and replaced with the current Office action.

Claims 1-22 are pending and subject to restriction.

Election/Restriction

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-4, drawn to a purified alcohol dehydrogenase.

Group II, claim(s) 5-12 drawn to a method of making an aldehyde dehydrogenase.

Group III, claim(s) 13-22, drawn to a method of making a carboxylic acid with a purified alcohol dehydrogenase or a cell free extract of *Gluconobacter*.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

First, the inventions of groups II and III do not match a permitted category as PCT Rule 13.2 does not provide for multiple methods or products in one category. For example, group I is directed to a process of making an aldehyde dehydrogenase with a strain of *Gluconobacter* and group III is drawn to a method of using the composition of group I or a cell free extract of *Gluconobacter*, which constitute the use and making of different compositions requiring different levels of purity and/or additional requirements for their functional intended use.

No common inventive concept is shared among groups I through III, since a technical relationship is lacking among the claimed inventions involving one or more special technical features because the production of aldehyde dehydrogenase with *Gluconobacter oxydans* FERM BP-3812 is known in the art. See, e.g., U.S. Patent No. 6,242,233, col. 6, lines 38-46.

The requirement of unity of invention is not fulfilled because there is no technical relationship among those inventions involving one or more of the same or corresponding special technical features. The expression "special technical features" means those technical features

Art Unit: 1651

that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art. Therefore, a technical relationship is lacking among the claimed inventions involving one or more special technical features.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
